FLU SEASON AHEAD

- In the past two years there has been a decrease in coverage among children and pregnant people
- Only about 43% of adults 18-49 years with a chronic health condition got a flu vaccine last season

Flu remains a potent and dangerous health threat

**Anyone 6 months
of age or older
needs a flu vaccine**

Those at high risk for Flu are

- People aged 65 or older
- People with chronic conditions
- Immunocompromised
- Young children
- Pregnant women
